Here you go Bruce. I'm giving you the pp, not a pdf. I also corrected the information for Frolich on the acknowledgement page. We have Bureau of Economic Geology in the report and he called us on it.

Subject: Seismicity talk

Phil- Would you mind sharing your seismicity GWPC presentation with me? I probably can get the pdf thru GWPC, but I'm going to talk to a UK group coming in about hydraulic fracturing and I know they will have a Seismicity report question. I may just take a slide or two from yours or just try to get the kernel of information by creating a new slide.

Bill and I talked to a Canadian group on January 15th but we did not bring up seismicity since the report was not out. I'll attach our typical presentation so you can see what one looks like. Thanks in advance and I will clear my slides beforehand.
